PROFESSIONAL SUMMARY

I am a Management Information Systems graduate with hands-on experience in enterprise IT infrastructure, system integration, and L2/L3 technical support within broadcast technology environments. My background combines a solid academic foundation in networking and system administration with practical experience supporting mission-critical enterprise systems that power broadcast operations for seven major Turkish television channels.

During my university education, I gained practical laboratory experience in networking fundamentals, Linux systems, and infrastructure technologies, including switch configuration, subnetting, VLAN configuration, DNS setup, and basic network administration. I also gained hands-on exposure to monitoring and security platforms such as Wazuh, OpenVAS, Graylog, Elasticsearch, and Grafana through academic projects and laboratory exercises.

In my current role at iSoft, I provide L2/L3 technical support for enterprise Media Asset Management (MAM) and broadcast automation systems operating in high-availability production environments. My responsibilities include investigating application and integration issues through log analysis, performing Microsoft SQL Server database diagnostics, supporting Elasticsearch and Kibana troubleshooting, validating fixes in test environments, and assisting with deployment and technical documentation. I am comfortable diagnosing technical issues across application, integration, database, and infrastructure layers.

I am passionate about networking, Windows Server technologies, and enterprise IT infrastructure. I continuously improve my technical skills through ongoing learning and hands-on home lab projects focused on networking, Windows Server, virtualization, and enterprise infrastructure technologies. My long-term goal is to build a career in network engineering, systems administration, or infrastructure operations, where I can contribute to reliable, secure, and highly available IT environments.

EXPERIENCE

L2/L3 Technical Support & System Integration Specialist — ISOFT

İstanbul • January 2026 – Present

- Install, configure, and provide L2/L3 operational support for enterprise Media Asset Management (MAM) systems across production and test environments.
- Troubleshoot application, infrastructure, and integration issues through detailed log analysis and root cause investigation.
- Perform Microsoft SQL Server database checks, connection management, and SQL queries to support troubleshooting and system diagnostics.
- Diagnose indexing, cluster health, and performance issues using Elasticsearch and Kibana.
- Support broadcast integration workflows involving SmartPlay, MediaDeck 7000, SMP, Provys, BXF, and VSX video server platforms.
- Manage Windows Server components, including Active Directory administration, IIS installation, website deployment, and service configuration.
- Monitor Windows services, network connectivity, REST services, SSDB, application health, and port configurations to ensure reliable system operation.
- Validate application fixes and configuration changes through functional and integration testing in test environments before production rollout.
- Create system and network architecture diagrams using draw.io to document deployments, integration flows, and troubleshooting references.
- Maintain technical documentation and asset/inventory records for institutional deployments.
- Prepare technical reports and customer-facing explanations based on investigation findings, and provide structured feedback to software development teams on product-related issues.

Software Tester & Feedback Analyst (Mobile App) — Turkish Education Foundation (TEV)

Remote • July 2025 – Present

- Participate in mobile application testing as part of the TEV Obigenç project.
- Report bugs and usability issues, contributing to iterative design improvements.
- Provide structured feedback to enhance overall user experience.

IT Intern — Bilecik Şeyh Edebali University (Rectorate)

Bilecik • November 2024 – June 2025

- Provided entry-level technical support and monitored basic system issues.
- Identified infrastructural needs and proposed improvement strategies.
- Collected feedback and prepared system analysis reports based on user requirements.
- Collaborated with academic and administrative units to understand IT usage needs.

Web Developer Intern — Hempa Children's Association

Ankara • June 2024 – August 2024

- Redesigned the association's website using Wix with a focus on user experience and accessibility.
- Improved SEO structure and layout and resolved mobile compatibility issues for cross-device usability.
- Integrated donation and blog sections aligned with the organization's branding.

Volunteer — Ministry of Family and Social Services

Zonguldak • September 2016 – September 2020

- Provided basic robotics and coding education to children.
- Conducted seminars on children's legal rights and represented Zonguldak in national child rights forums.

TECHNICAL SKILLS

Operating Systems: Windows Server, Linux (Ubuntu)

Networking: TCP/IP, VLAN, DNS, DHCP, Routing & Switching, Network Troubleshooting

System Administration: Active Directory, IIS, Windows Services, REST Services, System Integration

Databases: Microsoft SQL Server, SQL, Database Normalization

Monitoring & Logging: Elasticsearch, Kibana, Graylog, Grafana, Wazuh, OpenVAS

Broadcast Systems: MAM, SmartPlay, MediaDeck 7000, SMP, Provys, BXF, VSX

Programming: Python, C#, C++, R, HTML5, CSS3

Tools: Git, GitHub, Visual Studio, Visual Studio Code, draw.io

EDUCATION

Management Information Systems, B.Sc. — Bilecik Şeyh Edebali University

Bilecik • June 2025 • GPA: 3.15 / 4.00

Relevant Courses: Computer Networks and Security, Information Systems Security, System Analysis and Design, Data and Information Management, Artificial Intelligence, Human–Computer Interaction

PROJECTS

ESP32 Weather Station — IoT weather monitoring system built on ESP32.

C++ • Arduino IDE • ESP32 • IoT | github.com/LastMohikan/Esp32-Ta-inir-Hava-Durumu_cihazı

ESP32 Network Penetration (IoT) — Wireless security testing tool running on ESP32.

C++ • ESP32 • Wi-Fi Security | github.com/LastMohikan/Esp32-marauder

HackRF One Anomaly Detector — RF signal anomaly detection experiment.

HackRF • Arduino • SDR | github.com/LastMohikan/Hackrf-arduino-kumanda-tespit-test

PDF Summarizer — Automated PDF text summarization tool.

Python | github.com/LastMohikan/Pdf-ozetleyici

F1 Pit Stop Impact Analysis — Statistical analysis of pit stop effect on race outcomes.

R • Data Analysis | github.com/LastMohikan/Formula1-yarislari-pit-stop-yarisa-etki-tahmini-R
